

# Society for Conservation Biology (SCB)

## Austral and Neotropical America (ANA) Section

### What is the Society for Conservation Biology?

The Society for Conservation Biology (SCB) is a global community of conservation professionals. The more than 8000 members are dedicated to promoting the scientific study and conservation of biological diversity on the planet. Our membership includes a wide range of people interested in conservation: researchers, resource managers, educators, government and private conservation workers, and students.

### What is the ANA Section?

The ANA Section of SCB is one of seven international sections covering the world. Established in 2003, it is formed of members from Central and South America and the Caribbean. Members are interested in having a scientific organization that plays a greater role in the conservation of biodiversity in the region.

### Why should I join?

Because there is a need in the ANA region for the application of science in conservation programs. A strong professional society like SCB can play a fundamental role. As a member of the ANA section, you get:

- Online access to top scientific journals in the field of conservation
- Membership to an international scientific society
- A network of people working in conservation in Latin America

### How do I join?

Membership is only \$10\*!

To join, go to the website ([www.conbio.org/join/](http://www.conbio.org/join/)), join the Society for Conservation Biology, and select ANA as your regional section.

For the fastest updates, join us on **Facebook** and **Twitter** (see below).

*\* This price and benefits only apply for residents of the region*

### Mission

Our mission is to promote the science of conservation biology and its application to conserve biological diversity in Latin America.

### Goals

- Increase awareness and understanding of conservation issues.
- Strengthen conservation biology research and its application in the region.
- Advocate for biological diversity and promote the role of science in conservation.
- Develop, promote and facilitate communication networks.

### Publications you get free

- Conservation Biology & Biological Conservation (top 2 conservation science journals in the world)
- Conservation Magazine (award winning environmental magazine)
- NeoCons (neo-tropical conservation e-newsletter)
- quarterly newsletter of SCB
